

Planning

Input: Given that you already have 1 furnace, 1 crafting_table, 3 iron_ingot, how to get 1 iron_boots ?

Output: I need to carry out the following steps in sequence: Step 1: chop trees to get 1 logs. Step 2: craft 2 stick. Step 3: dig down and mine 3 cobblestone. Step 4: craft 1 stone_pickaxe. Step 5: dig down and mine 4 iron_ore. Step 6: smelt 1 iron_ingot. Step 7: craft 1 iron_boots.

Input: Given that you already have 1 cobblestone, how to get 1 stone_pickaxe ?

Output: I need to carry out the following steps in sequence: Step 1: chop trees to get 3 logs. Step 2: craft 9 planks. Step 3: craft 4 stick. Step 4: craft 1 crafting_table. Step 5: craft 1 wooden_pickaxe. Step 6: dig down and mine 2 cobblestone. Step 7: craft 1 stone_pickaxe.

Captioning

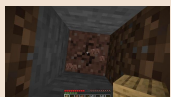

Input: Describe this image

Output: The image shows a Minecraft gameplay scene where the player is using a crafting table in an outdoor grassy area. The crafting interface is open, and the player is in the process of crafting a wooden pickaxe. In the crafting grid, there are two wooden sticks placed vertically in the center and bottom-middle slots, and six wooden planks placed across the top row. The player's inventory is visible at the bottom of the screen, containing only wooden planks. The background reveals grass blocks and the crafting table itself.

Embodied QA

Input: What type of environment is the player in?

Output: <think> The image is a first-person Minecraft view of a player inside a small, vertical shaft or hole underground. Visible are the sides of the shaft made up of stone, dirt, andesite, and the bottom of the hole. There are no visible entities, mobs, or structures within the hole just natural blocks. The hotbar is visible at the bottom of the screen: the player currently holds a wooden plank block in their hand. The lighting suggests it is underground, with no direct sunlight visible, and there are no weather effects present. </think> <answer> The player is in an underground shaft or a narrow hole, surrounded by stone, dirt, and granite blocks.</answer>

Input: How many hearts of health does the player currently have?

Output: <think> This image is a first-person view from the game Minecraft. The player is near the shore of a river or lake, facing a grassy landscape with birch and oak trees spread throughout, characteristic of a forest or flower forest biome. Several patches of flowers and grass are visible on the ground. The sky is clear with a few clouds. The status bar at the bottom shows full health (10 hearts), full hunger (10 drumsticks). The hotbar is visible at the bottom, currently empty with no items in any slots, and the player's hand is empty, indicating nothing is held. </think> <answer> The player has 10 hearts of health (full health).</answer>

Grounding

Input: Trace the outline of the cow visible outdoors.

Output: <think> The image shows a first-person view from within the game Minecraft, displaying a grassy plains biome under a blue sky with some clouds. In the foreground, there are multiple cows visible: one cow's face is looking directly at the player just ahead, while another cow is partially visible to the left. </think>

Input: Locate the position of the horse in the view.

Output: <think> The image shows a grassy plains biome with several trees in the background. A grey horse is visible in the middle distance, standing on the grass. In the foreground, there is a fire with orange flames and black smoke particles rising, likely caused by adjacent lava or burning netherrack. </think>

Reflection

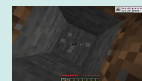

Input: determine whether the task can continue.

Output: <think> The player has full health and hunger bars, indicating no imminent danger or status issues. There are no hostile mobs visible, and the environment is a typical underground mining tunnel composed mostly of stone blocks. Thus, the task of crafting a diamond sword can continue without any critical interruptions. </think> <answer>The task can continue.</answer>
