

Planning

Input

Given that you already have 3 planks, 1 stick, how to get 1 wooden_hoe ?

Thinking reward

wooden_hoe: {'stick': 2, 'planks': 2, }
 stick: {'planks': 2}
 planks: {'logs': 2}
 crafting_table: {'planks': 4}

+0.75

Answer reward

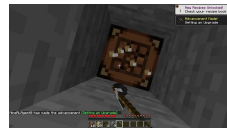

step 1: chop trees to get 2 logs
 step 2: craft 3 planks
 step 3: craft 1 stick
 step 4: craft 1 crafting_table
 step 5: craft 1 wooden_hoe

Embodied QA

Input

What tool is the player currently holding and using?

Thinking reward

The image shows... where the player is underground, surrounded by stone blocks and mining a crafting table using a **iron pickaxe**.

-0.20

Answer reward

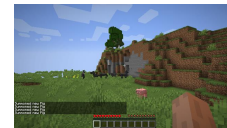

I will analyze the questions in relation to the visual content to derive the correct answers. The player is holding and using a **stone pickaxe**.

+0.95

Grounding

Input

Locate the pig in the view.

Thinking reward

The image shows... There are **two sheep** on the left side of the image, and there is **no pig** in the picture.

-0.50

Answer reward

[383, 254, 433, 372]

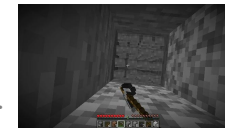

ground-truth: [359, 218, 423, 346]
 predict: [383, 254, 433, 372]
 IoU = 0.36

+0.72

Reflection

Input

Determine whether the task “craft a golden” axe can continue.

Thinking reward

The player is underground, mining with a stone pickaxe, and both health and hunger levels are sufficient for continued task execution. There are no indicators that progress toward the task cannot continue. Therefore, the task can proceed successfully.

-0.15

Answer reward

No elements within the visual display will affect task execution. **The task can continue.**
